# Executive Corrective Action Report

A management-level account of the reported issues, the user-facing corrections, and the evidence supporting release readiness.

7

Visual corrections verified

3

Desktop workflows confirmed

2

Follow-up checks identified

## ASSESSMENT

Audience  
**Executive / project**

Evidence format  
**Before / after**

Prepared  
**29 July 2026**

This report focuses on visible outcomes, user impact, and remaining acceptance work. Detailed technical test artifacts are retained separately for the development team.

# Executive Summary

Seven reported usability and result-presentation issues were corrected and verified through controlled before/after comparisons. Three representative workflows were also confirmed in the desktop application. The assessed corrections improve clarity, reduce misleading feedback, and make investigation results easier to understand.

**Management conclusion** The tested visual and workflow corrections are suitable for release. Final acceptance still requires a Windows taskbar check, while the number of Adversea matches remains dependent on the external data provider.

| Reported area                    | Status      | Verification                   |
|----------------------------------|-------------|--------------------------------|
| Trial charge notification        | VERIFIED    | Before/after comparison        |
| API token field                  | VERIFIED    | Comparison and desktop check   |
| Application bottom whitespace    | VERIFIED    | Comparison and desktop check   |
| PEP relative/associate status    | VERIFIED    | Comparison and result check    |
| Shared search target             | VERIFIED    | Combined-search check          |
| Country selection usability      | VERIFIED    | Comparison and desktop check   |
| Adverse activity emphasis in PDF | VERIFIED    | Exported PDF comparison        |
| Windows taskbar icon contrast    | IMPLEMENTED | Windows package check pending  |
| Multiple Adversea matches        | OPEN        | Provider confirmation required |

## Scope Boundary

The report verifies the behavior controlled by OpenRisk. External service availability and the number of records returned by a provider are outside this acceptance boundary. Repeatable local data was used where external calls would make the comparison unstable.

# Verification Method

## A / Controlled comparison

The reported and corrected versions were reviewed under the same conditions, using the same data, screen size, and light theme. This makes the visible difference attributable to the correction.

14/14 PASSED

## B / Desktop workflow check

Representative tasks were completed in the desktop application to confirm that the corrections work within normal project, search, result, and settings workflows.

3/3 PASSED

|                      |                                                                        |
|----------------------|------------------------------------------------------------------------|
| Visual consistency   | All screenshots use the light theme and the same comparison conditions |
| Application coverage | Projects, combined searches, results, settings, and PDF output         |
| Test data            | Repeatable local scenarios that do not depend on provider availability |
| Supporting evidence  | Screenshots, recordings, automated results, and generated PDF output   |

The following pages present the reported condition and corrected result at full page width. Each comparison is followed by selected confirmation from the desktop application where this adds useful assurance.

## EV-01

# Trial charge notification

REPORTED CONDITION

**Outcome** Trial users are no longer shown a misleading 0.10 EUR charge.

## BEFORE

The screenshot displays the OpenRisk web application interface. On the left is a sidebar with icons for document, search, and clock. The main content area is divided into three sections: 'Select Plugin', 'Search', and 'Search Criteria'. In the 'Select Plugin' section, 'OpenSanctions v0.7.0' is selected, and 'Adversea v0.6.0' is also available. The 'Search' section has a 'Target' field containing 'Robert Fico' and a 'Run Scan' button. The 'Search Criteria' section shows 'Plugin: OpenSanctions' and 'Target: Robert Fico'. Below this, it indicates 'RESULTS (Completed) 1 ROWS'. On the right, a 'Scan Informations' sidebar shows a 'SCAN HISTORY' table with three entries: 'Evidence scan', 'Svetlana Ficová', and 'Adverse media evidence', each with '1 result' and a timestamp of '06/19/2026, 12:00 PM'. A blue notification box at the bottom right states: 'OpenSanctions: 0.10 EUR used' and 'This charge was incurred during the last scan.'

A charge appears even though the user is operating within the free trial.

## EV-01

VERIFIED

# Trial charge notification

**Outcome** Trial users are no longer shown a misleading 0.10 EUR charge.

## AFTER

The screenshot displays the OpenRisk 'New Scan' interface. The main area is titled 'New Scan' and includes instructions: 'Select a plugin, enable the endpoints you want, fill in the required fields and run.' Below this, the 'Select Plugin' section shows two options: 'OpenSanctions v0.7.0' (selected) and 'Adversesea v0.6.0'. The 'Search' section has a 'Target' field with 'Robert Fico' and a 'Run Scan' button. The 'Search Criteria' section shows 'Plugin: OpenSanctions' and 'Target: Robert Fico'. A 'Save PDF' button is also present. The right sidebar, titled 'Scan Information', shows a list of scans: 'Evidence scan' (OpenSanctions, 1 result, 06/19/2026, 12:00 PM), 'Svetlana Ficová' (Adversesea, 1 result, 06/19/2026, 12:00 PM), and 'Adverse media evidence' (Adversesea, 1 result, 06/19/2026, 12:00 PM).

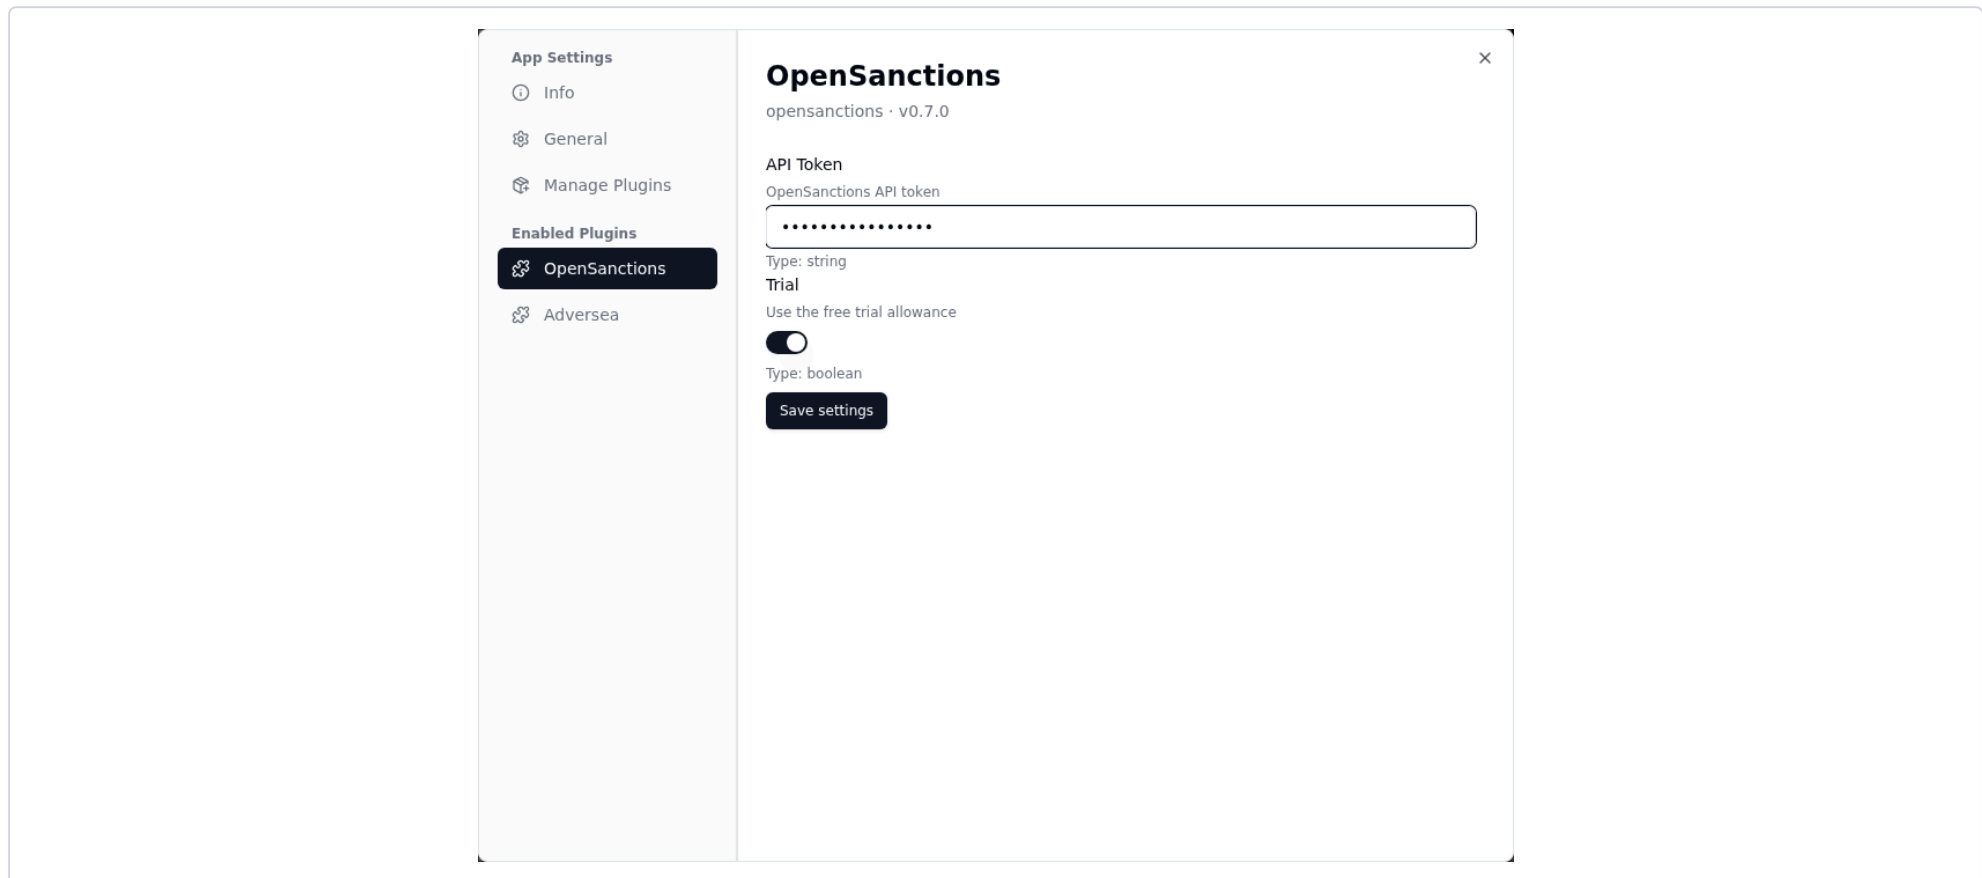

The trial search completes without suggesting that the user has been charged.

## EV-02

## REPORTED CONDITION

# API token input border

**Outcome** The API token field is fully visible and visually consistent on every side.

**BEFORE**

The left edge of the field appears clipped in the settings window.

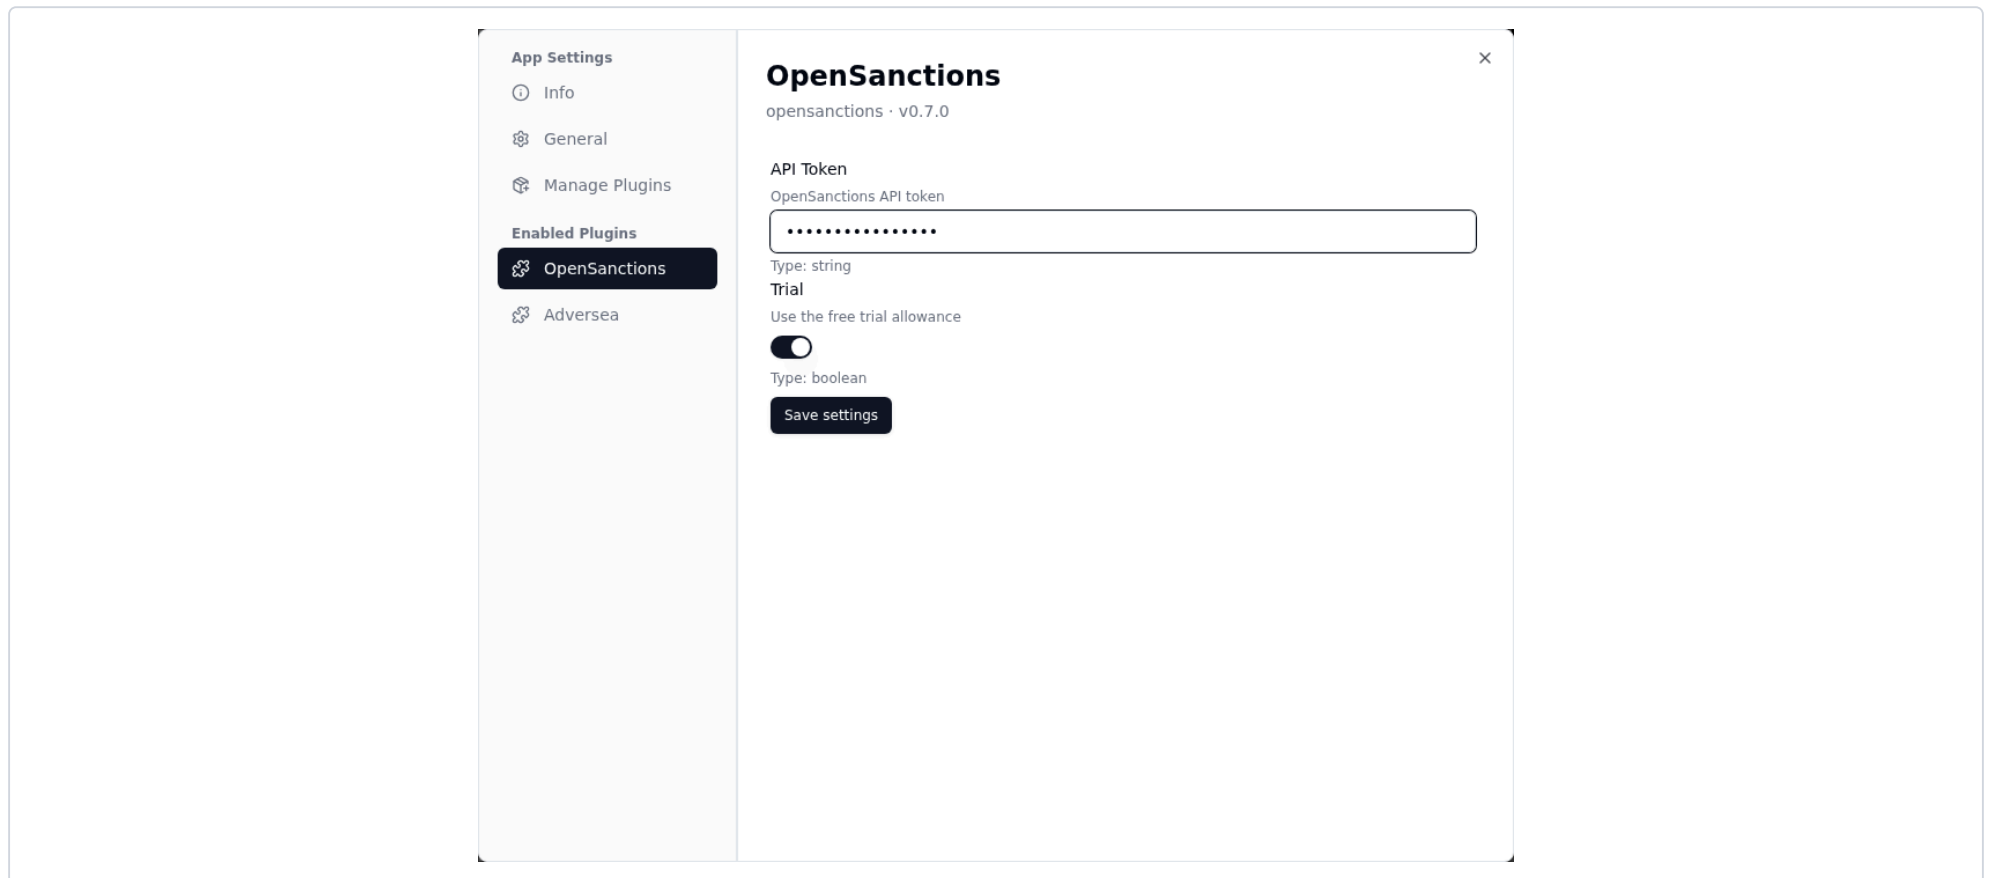

## EV-02

VERIFIED

# API token input border

**Outcome** The API token field is fully visible and visually consistent on every side.

## AFTER

The complete field outline is visible and aligned with the surrounding settings.

## EV-03

# Application scroll containment

REPORTED CONDITION

**Outcome** Long search forms scroll within the workspace without moving the whole application or exposing empty space.

## BEFORE

The screenshot displays the OpenRisk application interface. On the left, a sidebar contains a list of search options: "Social Media", "RPO", "Debtors", and "Entity Recognition", each with a checkbox and a "Run" button. Below this is a "Search" section with fields for "Target" (labeled "Person name"), "Country" (labeled "Country used for the source search"), "Query" (labeled "Optional evidence fixture input"), and "Additional context" (labeled "Optional evidence fixture input"). On the right, a panel shows search results for "Adverse media evidence" with a "1 result" indicator and a timestamp of "06/19/2026, 12:00 PM".

The entire application can move when several search options exceed the available height.

## EV-03

VERIFIED

# Application scroll containment

**Outcome** Long search forms scroll within the workspace without moving the whole application or exposing empty space.

## AFTER

The screenshot displays the OpenRisk application interface. The layout is divided into three main sections: a left sidebar, a central workspace, and a right sidebar. The left sidebar contains navigation icons for document, search, and clock. The central workspace is the primary area for data entry and contains two main panels. The top panel, titled 'Select Entrypoints', allows users to choose screening entrypoints to run, with options including PEP & Sanctions, Unit Analysis, Topic Report, Social Media, RPO, Debtors, and Entity Recognition. The bottom panel, titled 'Search', contains fields for 'Target' (Person name), 'Country' (Country used for the source search), 'Query' (Optional evidence fixture input), and 'Additional context' (Optional evidence fixture input). The right sidebar, titled 'Scan Informations', shows a 'SCAN HISTORY' section with two entries: 'Svetlana Ficová' and 'Adverse media evidence', both with '1 result' and a timestamp of '06/19/2026, 12:00 PM'. The application frame remains fixed while the central workspace scrolls.

Navigation and the application frame stay fixed while only the working area scrolls.

## EV-04

## REPORTED CONDITION

# Shared target across selected checks

**Outcome** A search target entered once is reused across all selected checks that need it.

**BEFORE**

The screenshot displays the OpenRisk Platform interface. On the left, a sidebar contains a search icon and a clock icon. The main content area is divided into two columns. The left column contains a list of checks: 'Unit Analysis' (selected), 'Topic Report', 'Social Media', 'RPO', 'Debtors', and 'Entity Recognition'. Below this is a 'Search' section with a 'Target' field containing 'Svetlana Ficová', a 'Country' dropdown set to 'SK', and a 'Run Scan' button. The right column contains a 'SCAN HISTORY' section with a search bar and three scan entries: 'Evidence scan', 'Svetlana Ficová', and 'Adverse media evidence'. Each entry shows a status (green circle with a checkmark), a count of results (1 error, 1 result), and a timestamp (06/19/2026, 12:00 PM). At the bottom right, there is a 'Save PDF' button.

**Search**

A combined search can report that the target is missing even though the user entered it.

## EV-04

VERIFIED

# Shared target across selected checks

**Outcome** A search target entered once is reused across all selected checks that need it.

## AFTER

The screenshot displays the OpenRisk platform interface for configuring a search. The main area is divided into two sections: 'Select Entrypoints' and 'Search'.

**Select Entrypoints:** This section allows users to choose which screening entrypoints to run. The input fields shared across selected entrypoints will be filled in once. The selected entrypoints are:

- ☒ PEP & Sanctions — Run PEP & Sanctions
- ☒ Unit Analysis — Run Unit Analysis
- ☐ Topic Report — Run Topic Report
- ☐ Social Media — Run Social Media
- ☐ RPO — Run RPO
- ☐ Debtors — Run Debtors
- ☐ Entity Recognition — Run Entity Recognition

**Search:** This section contains the search criteria:

- Target\***: Svetlana Ficová (Person name)
- Country\***: Slovakia (Country used for the source search)

A 'Run Scan' button is located at the bottom of the search section.

**Scan Informations:** This panel on the right shows the results of the search. It includes a 'FAVORITES' section and a 'SCAN HISTORY' section. The 'SCAN HISTORY' section lists the following scans:

- Evidence scan**: Adversea, 2 results, 06/19/2026, 12:00 PM
- Svetlana Ficová**: Adversea, 1 result, 06/19/2026, 12:00 PM
- Adverse media evidence**: Adversea, 1 result, 06/19/2026, 12:00 PM

The same combined search accepts the entered target and proceeds normally.

EV-05

REPORTED CONDITION

# PEP relative and close associate

**Outcome** Results now distinguish a direct PEP from a relative or close associate and show the known relationship.

## BEFORE

**Svetlana Ficová** aka Svetlana Svobodová **No PEP / No Sanctions**

The result clearly shows PEP: RCA, the related person, and the relationship.

## EV-06

# Human-friendly country selection

REPORTED CONDITION

**Outcome** Country codes are presented as an alphabetized, searchable list of readable country names.

## BEFORE

The screenshot displays the OpenRisk web application interface. On the left, a sidebar contains icons for document, search, and clock. The main area features a large dropdown menu for country selection, currently showing a list of country codes (US, AU, NZ, GB, DE, CZ, SK, IT, AT, BE, BG, HR, CY, DK, EE, FI, FR, GR, HU, IE). Below the dropdown is a 'Run Scan' button and a note: 'Fill in all required fields (\*) to run the scan.' The right sidebar, titled 'Scan Informations', includes a 'FAVORITES' section and a 'SCAN HISTORY' section with a search bar. Two scan results are visible: 'Svetlana Ficová' and 'Adverse media evidence', both showing '1 result' and a timestamp of '06/19/2026, 12:00 PM'.

The user must interpret and scan a list of technical country codes.

EV-06

VERIFIED

# Human-friendly country selection

**Outcome** Country codes are presented as an alphabetized, searchable list of readable country names.

AFTER

The screenshot displays the OpenRisk platform interface. On the left, a sidebar contains icons for document, search, and clock. The main content area is divided into two sections: 'Select Entryoints' and 'Search'. The 'Select Entryoints' section has a heading 'Select Entryoints' and a subtext 'Choose which screening entrypoints to run. Input fields shared across selected entrypoints will be filled in once.' Below this, there is a list of entrypoints with checkboxes: 'PEP & Sanctions', 'Unit Analysis' (selected), 'Topic Report', 'Social Media', 'RPO', 'Debtors', and 'Entity Recognition'. The 'Search' section has a 'Target' field with the value 'Target' and a 'Country' dropdown menu. The dropdown menu is open, showing a search bar with the text 'slov' and a list of results: 'Slovakia' (SK) and 'Slovenia' (SI). On the right, a sidebar titled 'Scan Informations' contains a 'FAVORITES' section and a 'SCAN HISTORY' section. The 'SCAN HISTORY' section has a search bar and two entries: 'Svetlana Ficová' (Adversea) and 'Adverse media evidence' (Adversea), both showing '1 result' and a timestamp of '06/19/2026, 12:00 PM'.

The user can search and select a country by its normal English name.

EV-07

REPORTED CONDITION

# Adverse activity emphasis in PDF

**Outcome** Confirmed adverse activity is prominently highlighted in exported PDF reports.

# RCA result in the desktop application

**Verified outcome** A completed search clearly presents PEP: RCA, the related person, and the relationship in the result.

The screenshot displays the OpenRisk desktop application interface. The main content area shows search results for the target 'Svetlana Ficová'. The search criteria include 'Plugin: Verification Plugin' and 'Target: Svetlana Ficová'. The results section, labeled 'RESULTS (Completed) 1 ROWS', shows a single result for 'Svetlana Ficová' with the alias 'aka Svetlana Svobodová' and a 'PEP: RCA' status. Below this, the 'BIRTH DATE' is listed as '1964-09-06', and 'NATIONALITIES' include 'Slovakia'. The 'RELATIVES AND CLOSE ASSOCIATES' section shows 'Robert Fico' as a 'spouse'. The 'SOURCES' section indicates 'OpenRisk deterministic verification fixture'. On the right sidebar, the 'Scan Informations' panel shows 'FAVORITES', 'SCAN HISTORY' (1), and a search bar. Below the search bar, a card for 'Svetlana Ficová' shows 'Verification Plugin' and '1 result' from '07/28/2026, 07:54 PM'. The top left of the application shows the 'OpenRisk' logo and a search icon. The bottom left of the application shows a sidebar with a search icon, a magnifying glass icon, a clock icon, and a list icon.

| Combined search target error    | One target supports all selected checks     | VERIFIED |
| Unfriendly country list         | Searchable list of readable country names   | VERIFIED |
| Unclear adverse PDF result      | Positive finding receives prominent warning | VERIFIED |
| Low-contrast Windows icon       | Higher-contrast icon prepared               | CHECK    |
| Unexpected number of matches    | Provider behavior isolated for follow-up    | OPEN     |

## Evidence Integrity

- Before and after screenshots were generated independently under the same conditions.
- All report screenshots use the light theme.
- Representative results were confirmed inside the desktop application.
- Repeatable local data was used so provider availability could not change the outcome.
- Supporting recordings and machine-readable test results are retained for audit.

## Limitations and Remaining Work

**Windows taskbar icon**

A higher-contrast icon has been prepared, but this verification environment cannot produce a Windows taskbar capture. Final acceptance should include one screenshot from the next signed Windows package.

**Multiple Adversea matches**

The number of returned candidates depends on the external provider. This item requires confirmation using a provider response that contains multiple matches before it can be closed.

**Result****Ready for the tested scope**

The evidence supports the listed corrections to notifications, settings, layout, search inputs, result presentation, and PDF output. No blocking issue was found in the tested desktop workflows. The Windows icon and provider-dependent match count remain explicit follow-up items.
