PRED OPRAVOU

The screenshot displays the OpenRisk platform interface. On the left, a sidebar contains icons for a home page, a search function, and a clock. The main content area is divided into three sections: 'Select Plugin', 'Search', and 'Search Criteria'. The 'Select Plugin' section shows two options: 'OpenSanctions v0.7.0' (selected) and 'Adversea v0.6.0'. The 'Search' section has a 'Target*' field with 'Robert Fico' entered. The 'Search Criteria' section shows 'Plugin: OpenSanctions' and 'Target: Robert Fico'. A 'Run Scan' button is located below the search criteria. On the right, a 'Scan Informations' sidebar shows a list of scans. The first scan, 'Evidence scan', is highlighted and shows '1 result' from 'OpenSanctions' on '06/19/2026, 12:00 PM'. Below it, two other scans are listed: 'Svetlana Ficová' and 'Adverse media evidence', both showing '1 result' from 'Adversea' on the same date and time. A notification bubble at the bottom right states: 'OpenSanctions: 0.10 EUR used. This charge was incurred during the last scan.'
